#### **DETAILED ACTION**

Claim(s) 1, 3, 5, 7, 17, 19, 21 and 23 is/are pending.

### Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 14 August 2006 has been entered.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1, 3, 5, 7, 17, 19, 21 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayashi et al. (JP 15-147477) on the same grounds as stated in the

Art Unit: 1742

Office Action of 10 January 2006. The Examiner notes that claim 1 was amended to incorporate the features of original claim 2.

Claims 1, 3, 5, 7, 17, 19, 21 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toru et al. (JP2004-84019-A) on the same grounds as stated in the Office Action of 10 January 2006. The Examiner notes that claim 1 was amended to incorporate the features of original claim 2.

# Response to Arguments

Applicant's arguments filed 14 August 2006 have been fully considered but they are not persuasive.

Preliminary, the Examiner notes that all pending claims were rejected over Hayashi or Toru. With respect to the limitation the ratio of precipitated Nb to the total amount of Nb would be from about 5 to about 80%, the Examiner asserted inherency based on the teaching of Hayashi and Toru that the cooling after hot rolling would be stopped at 400 degrees or less and therefore Hayashi and Toru teach substantially similar compositions and substantially similar processing and therefore the resulting properties are presumed inherent. See MPEP 2112.01 I. The burden then shifts to applicant to show that the properties are not necessarily present. *Id*.

Applicant notes that Steel No. 8 in Table 4 of the instant specification is coiled at 250 degrees C after rapid cooling which results in a 4% ratio of precipitated Nb to the total amount of Nb. Applicant argues that this evidences that the steels of Hayashi and Toru do not necessarily have the claimed Nb ratio.

Page 4

In response, the Examiner disagrees that the evidence shows that the steels of Hayashi and Toru would not necessarily have the claimed Nb ratio. Steel No. 8 of the instant specification is cooled rapidly to 250 degrees C and has a Nb ratio of 4%, which is arguably within the claimed range of **about 5%** to about 80%. Whereas the steels of Hayashi and Toru are cooled rapidly to less than 400 degrees C... nearly 150 degrees C higher. The evidence presented in Table 4 as a whole shows when cooling finishing temperature is higher then the Nb ratio is higher. The evidence as a whole agrees with rather than contradicts the Examiner's position.

#### Conclusion

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 10/807,693

Art Unit: 1742

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael P. Alexander whose telephone number is 571-272-8558. The examiner can normally be reached on M-F 10:00 - 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy V. King can be reached on 571-272-1244. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
